

Shun Shing Edible Oil Limited

Auditor's report and financial statements as at
and for the year ended 31 December 2022

Independent auditor's report

To the Shareholders of Shun Shing Edible Oil Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Shun Shing Edible Oil Limited ("the Company"), which comprise the statement of financial position as at 31 December 2022, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2022, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Bangladesh, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 35 in the financial statements, which indicates that the Company earned a net loss of BDT 333,574,633 during the year ended 31 December 2022 and, as of that date, the Company's current liabilities exceeded its total assets by BDT 156,484,626. As stated in Note 35, these events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of the financial statements that give a true and fair view in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's report (continued)

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In accordance with the Companies Act 1994, we also report the following:

- (a) we have obtained all the information and explanation which to the best of our knowledge and belief were necessary for the purpose of our audit and made due verification thereof;
- (b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appeared from our examination of those books; and
- (c) the statement of financial position and statement of profit or loss and other comprehensive income dealt with by the report are in agreement with the books of account.

1. Reporting entity

Shun Shing Edible Oil Limited is a private company limited by shares incorporated in Bangladesh under the Companies Act, 1994. Initially the company was registered in the name of China Friendship Cement Co. Ltd. vide registration No. CHC-2775 dated 04 September 1987. Subsequently, on 29 June 1989 the name of the company was changed to Seven Circle Cement Mills Ltd. vide REJCO No. 4465 dated 18 February 1989. Thereafter, on 09 July 2009 the name of the company has been changed again to Seven Circle Bitumen & Edible Oil Ltd. vide REJCO No. 6517 dated 13 May 2006. The company has changed its name from Seven Circle Bitumen & Edible Oil Ltd. to Shun Shing Edible Oil Ltd. from Register of Joint Stock Companies and Firms vide registration No. 201287310 dated 20 February 2013. The company has transferred its 100% shares to Bangladesh Edible Oil Limited and Adani Wilmar Pte. Limited dated 08 June 2016.

The Company is mainly engaged in refining of Crude Degummed Soyabean Oil (CDSO) and Crude Palm Oil (CPO) and packaging of the same for distributing in local market. Also, the Company provides crude oil transport services and oil processing services to its customers.

2. Basis of accounting

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs). They were authorised for issue by the Company's board of directors on 01 MAY 2023.

Details of the Company's accounting policies are included in note 34.

3. Functional and presentation currency

These financial statements are presented in Bangladesh Taka (Taka/Tk/BDT) which is also the functional currency of the Company. All amounts of financial statements have been rounded to the nearest Taka, unless otherwise indicated.

4. Use of judgments and estimates

In preparing these financial statements, management has made judgments, estimates and assumptions that affect the application of Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to estimates are recognised prospectively.

A. Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following note:

- Leases: whether an arrangement contains a lease Note 29

B. Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties at 31 December 2022 that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities in the next financial year is included in the following notes:

- | | |
|--|----------------|
| - Movement in deferred tax balances; | Note 13(C) |
| - Inventories; | Note 15 |
| - Contingent liabilities; | Note 31 |
| - Useful life of property, plant and equipment | Note 34(A)(ii) |

<i>In Taka</i>	Note	2022	2021
Provision for income tax	13(D)(i)	382,727,009	318,963,879
Advance tax deposits and claims with tax authority	13(D)(ii)	(320,857,897)	(195,414,391)
Balance as at 31 December		61,869,112	123,549,488

i. Provision for income tax

<i>In Taka</i>	2022	2021
Balance at 1 January	318,963,879	259,945,981
Provision made during the year	63,763,130	49,017,898
	382,727,009	318,963,879
Adjustments made during the year	-	-
Balance at 31 December	382,727,009	318,963,879

ii. Advance tax deposits and claims with tax authority

<i>In Taka</i>	2022	2021
Balance at 1 January	195,414,391	127,362,380
Paid during the year	125,443,306	68,052,011
	320,857,697	195,414,391
Adjustments made during the year	-	-
Balance at 31 December	320,857,697	195,414,391

Notes to the financial statements (continued)

14. Employee benefits
See accounting policy in Note 34(H)

Deferred liability-gratuity payable

In Taka	2022	2021
Balance at 1 January	17,297,108	12,093,017
Provision made during the year	7,160,259	5,452,843
	24,457,367	17,545,860
Paid during the year	(234,767)	(248,752)
Balance at 31 December	24,222,600	17,297,108

15. Inventories
See accounting policy in Note 34(E)

In Taka	Note	2022	2021
Raw materials		856,210,983	66,127,969
Goods in transit	15(A)	1,484,375,338	4,271,816
Finished goods		382,620,446	807,705,478
Packing materials, store materials, spares and others		209,029,142	182,789,211
		2,932,235,909	1,080,894,474

Details break-up of inventories could not be given as it is quite difficult to quantify each item in a separate and distinct category due to large variety of items. Information in detailed form may not be useful for the users.

A. Goods in transit

In Taka	2022	2021
Raw materials in transit - trade	1,479,107,239	-
Other materials in transit - non trade	5,268,099	4,271,816
	1,484,375,338	4,271,816

Risk and rewards of goods in transit have been transferred to the Company but are yet to be received in factory warehouse for production.

16. Trade and other receivables
See accounting policies in note 34(F)

In Taka	Note	2022	2021
Trade receivables	16(A)	209,932,257	1,019,566
Trade receivables due from related party	16(B)	4,159,635,416	2,919,900,324
Other receivables	16(C)	158,567,376	15,497,128
		4,528,135,049	2,935,417,018

Notes to the financial statements (continued)

27. Financial risk management

The Company has exposure to the following risks from its use of financial instruments:

- A. Credit risk
- B. Liquidity risk
- C. Market risk

The Board of Directors have overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

A. Credit risk

Credit risk is the risk of a financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from buyers and dealers.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis.

In monitoring credit risk, debtors are grouped according to their risk profile, i.e. their legal status, financial condition, ageing profile etc. Accounts and other receivables are mainly related to the Company's buyers. The Company's exposure to credit risk on trade receivables is mainly influenced by the individual payment characteristics of credit purchaser. Credit risk does not arise in respect of any other receivables.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

i) Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

<i>In Taka</i>	<i>Note</i>	2022	2021
Trade receivables	16(A)	209,932,257	1,019,566
Trade receivables due from related party	16(B)	4,159,635,416	2,919,900,324
Cash at bank	16	289,107,073	810,964,335
		4,658,674,746	3,731,884,225

Notes to the financial statements (continued)

27. Financial risk management (continued)

A. Credit risk (continued)

Ageing of trade receivables

In Taka	2022	2021
Trade receivables	209,932,257	1,019,566
Trade receivables due from related party	4,159,635,416	2,919,900,324
	4,369,567,673	2,920,919,890

a) The ageing of trade receivables at 31 December was:

Invoiced 0-30 days	207,457,903	1,019,566
Invoiced 31-60 days	2,474,354	-
Invoiced 61-90 days	-	-
Invoiced 91-120 days	-	-
Invoiced 121-365 days	-	-
Invoiced over 365 days	-	-
	209,932,257	1,019,566

b) The ageing of trade receivables due from related party at 31 December was:

Invoiced 0-30 days	359,012,413	2,919,900,324
Invoiced 31-60 days	553,285,581	-
Invoiced 61-90 days	325,701,098	-
Invoiced 91-120 days	-	-
Invoiced 121-365 days	820,605,069	-
Invoiced over 365 days	2,100,031,255	-
	4,159,635,416	2,919,900,324

This aging is based on the company's credit terms to different customers.

Notes to the financial statements (continued)

27. Financial risk management (continued)

B. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Moreover, the Company seeks to maintain short term lines of credit with scheduled commercial banks to ensure payment of obligations in the event that there is insufficient cash to make the required payment. The requirement is determined in advance through cash flow projections and credit lines with banks are negotiated accordingly. In extremely stressed conditions, the Company may get support from the parent Company in the form of shareholder's loan.

Exposure to liquidity risk

The followings are the contractual maturities of financial liabilities:

31 December 2022	In / Take	Note	Carrying amount	Expected cash flow	Contractual cash flows				
					5 months or less	6-12 months	1-2 years	2-5 years	More than 5 years

27. Financial risk management (continued)

C. Market risk

Market risk is the risk that any change in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

i. Currency risk

The Company is exposed to currency risk on certain revenues and import purchases. Majority of the Company's foreign currency transactions are denominated in USD and relates to procurement of crude soyabean oil, crude palm oil, machineries and spare parts from abroad.

Exposure to currency risk

The Company's exposure to foreign currency risk, based on notional amounts, was as follows:

In USD	2022	2021
Foreign currency denominated assets		
Trade receivables due from related party	-	5,358.18
Foreign currency denominated liabilities		
Trade payables due to related parties	20,835,350	32,178,066
Usance payable at sight / Usance acceptance under import LC (JPAS)	28,258,259	10,791,863
	20,835,350	32,178,066

The following significant exchange rates are applied at 31 December:

In Taka	Average rate		Year-end spot rate	
	2022	2021	2022	2021
USD 1	93.43	85.20	102.00	85.85

ii. Foreign exchange rate sensitivity analysis

The basis for the sensitivity analysis to measure foreign exchange risk is an aggregate corporate-level currency exposure. The aggregate foreign exchange exposure is composed of all assets and liabilities denominated in foreign currencies.

A 1% change in foreign exchange rates would have increased/(decreased) equity and profits or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates remain constant.

Effect in Taka	Profit/(loss)		Equity	
	Strengthening	Weakening	Strengthening	Weakening
31 December 2022				
USD (1% movement)	21,252,057	(21,252,057)	21,252,057	(21,252,057)
31 December 2021				
USD (1% movement)	27,624,869	(27,624,869)	27,624,869	(27,624,869)

iii. Interest rate risk

Interest rate risk is the risk that arises due to changes in interest rates. The Company is not exposed to fluctuations in interest rates as it has no floating interest rate bearing financial liability as at the reporting date. The Company has not entered into any agreement involving derivative instrument at the reporting date.

As at 31 December 2022, the interest rate profile of the Company's interest bearing financial instruments was:

In Taka	2022	2021
Fixed rate instruments		
Financial assets	18,900,603	759,460,358
Financial liabilities	2,882,342,434	926,481,433
Variable rate instruments		
Financial assets	-	-
Financial liabilities	-	-

Notes to the financial statements (continued)

28. Related party transactions

A. Parent and ultimate controlling party

Bangladesh Edible Oil Limited has 99.975% shareholding of the Company and remaining 0.025% shareholding goes to Adani Wilmar Pte Ltd. The ultimate controlling party of the Company is Adani Wilmar Limited.

B. Key management personnel compensation (included in operating expenses)

No such compensation is made to the key management personnel during the year.

C. Other related party transactions

Name of related party	Country	Nature of relationship	Nature of transaction	Transaction values for the year			Balance outstanding as at 31	
				2022	2021	December	2022	2021
Wilmar Trading Pte. Limited	Singapore	Related company	Purchase of ROL/CDSO	(5,273,131,905)	(4,034,582,838)		(2,122,460,810)	(2,762,485,838)

			Purchase of CDSO	(1,167,532,732)	(1,388,989,601)		(4,651,281,754)	(3,018,218,820)
			Purchase of Consumer Pack	(91,087,550)	(162,633,500)			
			Sale of Consumer Pack	4,467,052,058	3,251,471,452			
			Sale of Bulk Product	718,105,121	884,927,033		4,159,635,418	2,519,440,324
			Sale of By Product	26,721,400	13,505,926			

The Company purchases raw materials from the ultimate holding Company. The purchases are on the same terms and conditions as those entered into with other suppliers and payable under normal payment terms.

29. **Leases**
See accounting policies in note 34(P)

A. Leases as lessee (IFRS 16)

The company leases a Guest House. The lease term has started from July 2019 and will end on June 2022.

The Company also has a lease contract with Mongla port authority. Under this lease contract, the company paid the full amount up to June 2021. The lease contract is valid till February 2030, unless renewed.

i. Right-of-use assets

Right-of-use assets related to leased properties that do not meet the definition of investment property are presented as property, plant and equipment (see Note 19).

<i>In Taka</i>	2022	2021
Balance at 1 January	1,286,460	1,764,746
Depreciation charge for the year	(366,672)	(478,286)
Additions to right-of-use assets	1,079,044	-
Derecognition of right-of-use assets	50,893	-
Balance at 31 December	2,049,724	1,286,460

ii. Amounts recognised in profit or loss

<i>In Taka</i>	2022	2021
Interest on lease liabilities	1,004,917	460,870
	1,004,917	460,870

iii. Amounts recognised in statement of cash flows

<i>In Taka</i>	2022	2021
Total cash outflow for leases	5,505,785	786,507

A maturity analysis of lease liabilities is presented in note 27B.

B. Leases as lessor (IFRS 16)

The Company does not provide any lease facility to other entity.

30. Capital expenditure commitment

There was no capital expenditure commitment at 31 December 2022.

31. Contingent liabilities

<i>In Taka</i>	2022	2021
The Company has the documentary credit/letter of credit with The City Bank Limited at the year:	(858,113,293)	(4,376,400)
The Company has the documentary credit/letter of credit with HSBC Bank Limited at the year:	(22,996,920)	(2,763,791)
<i>Disputed tax claim for 2015-2016 (Assessment year 2016-2017):</i> The Company management has appeal to the HC & obtained stay order against recovery the arrear tax	3,534,335	3,534,335
<i>Disputed tax claim for July 2016 - December 2016 (Assessment year 2017-2018):</i> The Company management has appeal to the HC & obtained stay order against recovery the arrear tax	56,471,358	56,471,358
<i>Disputed tax claim for 2017 (Assessment year 2018-2019):</i> Company management is preparing to file a Reference Application before the High Court Division of the Supreme Court of Bangladesh against the order passed by Tax Appellate Tribunal	168,150,441	252,545,532
<i>Disputed tax claim for 2018 (Assessment year 2019-2020):</i> Company management has filed appeal to the Commissioner of Appeal (CTA) against the order passed by Deputy Commissioner	66,715,347	-
The company management has filed a appeal before the VAT Appellate Tribunal against the order passed by the Khulna VAT Commissionerate, Case # 3861/2022.	5,177,354	-

The above contingent liabilities have not been recognised as the directors expect favourable outcome from appeals.

32. Subsequent events

As of the date of these financial statements, no material impact has been identified by management on the Company's financial position, results of operations and cash flows and as such the Management has decided to continuously monitor, evaluate and measure the impacts on operations by remaining alert to the changing situations during the 2022 financial year.

33. Basis of measurement

The financial statements have been prepared on historical cost basis except for the inventories which are measured at lower of cost and net realisable value.

34. Significant accounting policies

The Company has consistently applied the following accounting policies to all periods presented in these financial statements.

Certain comparative amounts in the statement of financial position and statement of profit or loss and other comprehensive income have been reclassified as a result of either changes in accounting policy or for better presentation purpose, where necessary.

Set out below is an index of the significant accounting policies, the details of which are available on the following pages:

	<u>Page ref.</u>
A. Property, plant and equipment	31
B. Assets under construction	32
C. Investment property	33
D. Intangible assets	33
E. Inventories	34
F. Financial instruments	34

Q. Operating Profit	42
R. Reporting period	42
S. Statement of cash flows	42
T. Events after the reporting date	43

A. Property, plant and equipment**i. Recognition and measurement**

Items of property, plant and equipment, excluding land and land development, are measured at cost less accumulated depreciation and accumulated impairment losses, if any. Land and land development is measured at cost. The cost of an item of property, plant and equipment comprises its purchase price, import duties and non-refundable taxes, after deducting trade discount and rebates, and any costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the intended manner. Cost also includes initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Assets under construction represents the cost incurred for acquisition and/or construction of items of property, plant and equipment that are not ready for use at period end and are stated at cost.

34. Significant accounting policies (continued)

A. Property, plant and equipment (continued)

ii. Subsequent expenditure

The cost of replacing or upgrading part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day to day servicing of the property, plant and equipment are recognised in the statement of comprehensive income as incurred.

iii. Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss. Land is not depreciated.

The estimated useful lives for the current and comparative years are as follows:

- Building and improvement	40 years
- Plant and machinery	5-20 years
- Tools and equipment	3-5 years
- Furniture and fixtures	10 years
- Motor vehicles	5 years
- Tank and piping	20 years
- Jetty, pier and facilities	20 years
- Marine vessels	20 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

iv. Gains or losses on disposal

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss on disposal or retirement of an item of property, plant and equipment is determined as the difference between sales proceed and the carrying amount of the asset and is recognised in profit or loss.

B. Assets under construction

Assets under construction consist of acquisition costs of capital components of building and improvement, plant and machinery for refinery and packing plant expansion project, tools and equipment, tank and piping and related installation costs incurred until the date placed in service. In case of import of components, asset under construction is recognised when risks and rewards associated with such assets are transferred to the Company, i.e. at the time shipment is confirmed by the supplier.

34. Significant accounting policies (continued)

C. Investment property

Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in profit or loss.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss. When investment property that was previously classified as property, plant and equipment is sold, any related amount included in the revaluation reserve is transferred to retained earnings.

Rental income from investment property is recognised as other revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

D. Intangible assets

i. Recognition and measurement

Intangible asset (ERP software) that is acquired by the Company have finite useful lives is measured at cost less accumulated amortisation and accumulated impairment losses. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

ii. Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

iii. Amortisation

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss.

The estimated useful lives for the current year is as follows:

- Intangible assets (SAP and HRIS)	5 years
------------------------------------	---------

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

iv. Derecognition

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from its continued use. Gains or losses on disposals are determined by comparing the disposal proceeds with the carrying amounts and are recognised net.

34. Significant accounting policies (continued)

E. Inventories

Inventories are valued at the lower of cost and net realisable value. The cost of inventories is based on a weighted average basis for valuation of raw material, raw materials in transit, work in progress and finished goods, packing materials, stores and others. It also includes all costs in bringing the inventories to their present location and condition. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

There are no inventories to write-down to net realisable value as the cost of the inventory is lower than the net realisable value. Also there are no write-down of inventory due to provision for slow moving and obsolete items as the inventory is very fast moving for the entity. Also there are no indication of slow moving or obsolete inventories identified in the inventory count which requires to write down of inventories.

F. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i. Recognition and initial measurement

Trade receivables when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A trade receivable without a significant financing component is initially measured at the transaction price.

ii. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

34. Significant accounting policies (continued)

F. Financial instruments (continued)

ii. Classification and subsequent measurement (continued)

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management; the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

34. Significant accounting policies (continued)

F. Financial instruments (continued)

Financial assets include cash and cash equivalents, trade and other receivables, and long term receivables

(a) *Cash and cash equivalents*

Cash and cash equivalents comprise cash balances and all cash deposits with maturities of three months or less that are subject to an insignificant risk of changes in their fair value, and are used by the Company in the management of its short-term commitments.

(b) *Trade and other receivables*

Trade and other receivables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses.

Financial liabilities

All financial liabilities are recognised initially on the transaction date at which the Company becomes a party to the contractual provisions of the liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

Financial liabilities include trade and other payables etc.

(a) *Trade and other payables*

The Company recognises a trade and intercompany payables when its contractual obligations arising from past events are certain and the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits.

(b) *Loans and borrowings*

Bank overdrafts that are repayable on demand and short term loans and borrowings are stated at their costs. Short term loan repayable within twelve months from the date of statement of financial position. Those are classified as current liabilities whereas unpaid interest and other charges are classified as current liabilities.

G. Impairment

i. *Non-derivative financial assets*

The Company recognises loss allowances for ECLs on:
- financial assets measured at amortised cost;

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

34. Significant accounting policies (continued)

G. Impairment (continued)

i. Non-derivative financial assets (continued)

The Company measures loss allowances at an amount equal to lifetime ECLs as there is very low chance of the loss.

Loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

ii. Non-financial assets

The carrying amounts of the Company's non financial assets, other than biological assets, inventories, and deferred tax assets, are reviewed at each reporting date to determine whether there is an indication of impairment. If any such indication exists, then the assets recoverable amount is estimated. An impairment loss is recognised if the carrying amount of an asset or its related cash generating units (CGU) exceeds its estimated recoverable amount. For this purpose the entity is considered as single cash generating unit.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflow from continuing use that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount. Impairment losses are recognised in profit or loss.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

34. Significant accounting policies (continued)

H. Employee benefits

The Company maintains both non-funded contribution plan (provident fund and workers' profit participation fund) and defined benefit plan (unfunded gratuity fund) for its eligible permanent employees.

i. Defined contribution plan (provident fund)

Defined contribution plan is a post-employment benefit plan. The recognised Employees' Provident Fund is considered as defined contribution plan as it meets the recognition criteria specified for this purpose. All permanent employees contribute 10% of their basic salary to the provident fund and the Company also makes equal contribution.

The Company recognises contribution to defined contribution plan as an expense when an employee has rendered services in exchange for such contribution. The legal and constructive obligation is limited to the amount it agrees to contribute to the fund.

ii. Defined benefit plan (unfunded gratuity fund)

The Company operates an unfunded gratuity scheme, provision in respect of which is made covering all its permanent eligible employees. Gratuity payable to all eligible employees at the end of each year is determined on the basis of existing rules and regulations. Provision for gratuity payable is calculated by way of multiplying number of years served with the last drawn monthly basic salary. A service period of more than six months with the Company is considered as full year service for the purpose of gratuity calculation except for the first year of service which will have to be completed by an employee in order to become eligible for gratuity payment.

iii. Defined contribution plan (WPPF)

The Company is required to provide 5% of net profit before tax after charging such expense as WPPF in accordance with Bangladesh Labour Act, 2006.

I. Income tax

Income tax expenses comprise current and deferred tax. It is recognised in the statement of comprehensive income except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI.

i. Current tax

Current tax is expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous year. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at reporting date.

34. Significant accounting policies (continued)

I. Income tax (continued)

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purpose and the amounts used for taxation purposes. Deferred tax is not recognised for:

- a) Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that effects neither accounting nor taxable profit or loss;
- b) Temporary differences related to investment in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future, and
- c) Taxable temporary differences arising on the initial recognition of good will.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans of the company. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realised; such deductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

J. Provisions

A provision is recognised in the statement of financial position when the Company has a legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provision is ordinarily measured at the best estimate of the expenditure required to settle the present obligation at the date of statement of financial position. Where the effect of time value of money is material, the amount of provision is measured at the present value of the expenditures expected to be required to settle the obligation.

K. Foreign currency

Transactions in foreign currencies are translated to the functional currency of the Company at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortised cost in foreign currency translated at the exchange rate at the end of the year.

34. Significant accounting policies (continued)

K. Foreign currency (continued)

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items in a foreign currency that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on retranslation are recognised in the statement of comprehensive income.

L. Revenue from customers

The Company recognises as revenue the amount that reflects the consideration to which the Company expects to be entitled in exchange for goods or services when (or as) it transfers control to the customer.

To achieve that core principle, this standard establishes a five-step model as follows:

- Identify the contract with a customer;
- Identify the performance obligations in the contract;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations in the contract; and
- Recognise revenue when (or as) the entity satisfies a performance obligation.

The Company recognises revenue when (or as) the Company satisfies a performance obligation by transferring a promised good to a customer. Goods is considered as transfer when (or as) the customer obtains control of that goods. Revenue from sale of goods is measured at the fair value of the consideration received or receivable net of returns and allowances, trade discounts, rebates and Value Added Tax (VAT).

The Company applied IFRS 15 from 1 January 2018.

M. Finance costs

Finance costs comprise of interest expense on borrowings & exchange loss. Borrowing costs which are not directly attributable to the acquisition, construction or production of as qualified asset are recognised in profit or loss.

Foreign currency gains and losses are reported on a net basis as either finance income or finance cost depending on whether foreign currency movements are in a net gain or net loss position.

N. Finance income

Finance income comprises interest income on funds invested. Interest income is recognised as it accrues in statement of comprehensive income using the effective interest method.

O. Share capital

Ordinary shares issued by the Company are classified as equity.

34. Significant accounting policies (continued)

P. Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in IFRS 16.

i. As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

34. Significant accounting policies (continued)

P. Leases (continued)

i. As a lessee (continued)

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases, including IT equipment. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

ii. As a lessor

The Company has not leased any property as of 31 December 2022.

Q. Operating Profit

Operating profit is the result generated from the continuing principal revenue-producing activities of the Group as well as other income and expenses related to operating activities. Operating profit excludes net finance costs, share of profit of equity-accounted investees and income taxes.

R. Reporting period

The financial period of the Company covers 1 year from 1 January to 31 December and is followed consistently.

S. Statement of cash flows

Cash flows from operating activities are presented under indirect method as per IAS 7: Statement of Cash Flows.

T. Events after the reporting date

Events after the reporting period that provide additional information about the Company's position at the reporting date or those that indicate the going concern assumption is not appropriate are reflected in the financial statements. Material events after the reporting date that are not adjusting events are disclosed in note 33.

35. Going concern

The Company earned a net loss of BDT 333,574,633 during the year ended 31 December 2022; however, the accumulated loss of the Company was BDT 1,557,029,772 up to 31 December 2022 & the total liabilities have exceeded the total assets by BDT 156,484,626.

The financial statements have been prepared on a going concern basis (notwithstanding the above mentioned facts) which the directors believe to be appropriate for the following reasons:

As per management assessment there are no material uncertainties related to events or conditions which may cast significant doubt upon Company's ability to continue as a going concern. The management do not see any issue with respect to going concern due to pandemic COVID-19 also.

Notwithstanding the abovementioned fact, the Company has credit facilities for meeting capital and working capital requirements with The City Bank Limited and HSBC. The directors consider that this should enable the Company to continue in operational existence for at least 12 months from the date of approval of the financial statements by meeting its liabilities as they fall due for payment.

The directors believe that it remains appropriate to prepare the financial statements on a going concern basis. However, the uncertainty may cast significant doubt on the company's ability to continue as a going concern and thereby to continue realizing its assets and discharging its liabilities in the normal course of business. The financial statements do not include any adjustments that would result from the basis of preparation being inappropriate.

36. Standards issued but not yet effective

A number of new standards are effective for annual periods beginning after 1 January 2022 and earlier application is permitted. However, the Company has not early adopted the following new or amended standards in preparing these financial statements.

The following amended standards and interpretations are not expected to have a significant impact on the Company's financial statements.

- A. Onerous contracts - Cost of fulfilling a contract (Amendments to IAS 37).
- B. Interest rate benchmark reform - Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16).
- C. Other standards
 - COVID-19 Related Rent Concessions (Amendments to IFRS 16).
 - Property, Plant and Equipment: Proceeds before intended use (Amendments to IAS 16).
 - Reference to Conceptual Framework (Amendments to IFRS 3).
 - Classification of Liabilities as Current or Non-current (Amendments to IAS 1).
 - IFRS 17 Insurance Contracts and amendments to IFRS 17 Insurance Contracts.
